Bandung, Indonesia

A Bachelor of Informatics graduate and Full-Stack Web Developer bootcamp alumnus proficient in HTML, CSS, JavaScript, React.js, and Node.js. Experienced in building scalable web applications and delivering seamless user experiences through high-quality, responsive designs. A detail-oriented professional with strong analytical skills, eager to secure a full-time role as a Full-Stack Developer.

Project Experiences

URL Shortener API - Personal Project

Apr, 2026

Back-End Developer

- Engineered a high-performance URL shortening microservice using Node.js (ESM) and Express.js, focusing on a lightweight and scalable architecture.
- Integrated PostgreSQL with Prisma ORM v7, utilizing the native PostgreSQL adapter to manage a type-safe and optimized database schema.
- Implemented robust URL validation using the native `URL.canParse()` API and integrated IP-based rate limiting to protect the service from automated spam and resource exhaustion.
- Developed an atomic click-tracking system to capture analytics accurately without race conditions, ensuring data consistency across high-concurrency requests.

Advanced Movie REST API - Bootcamp Project

Apr, 2026

Back-End Developer

- Engineered a robust RESTful API using Node.js and Express.js, implementing a clean MVC (Model-View-Controller) architecture to ensure code modularity and scalability.
- Managed a MySQL relational database utilizing asynchronous operations (`mysql2/promise`), leveraging dynamic parameterized SQL queries to securely implement search, filter, and sorting functionalities while preventing SQL injection.
- Developed a secure stateless authentication pipeline using Bcrypt and JWT, integrated with Nodemailer to automate email-based account verification workflows for new users.
- Implemented secure physical file upload handling (`multipart/form-data`) using the Multer middleware, strictly protected by JWT authorization routes.

Task Manager REST API - Personal Project

Feb - Mar, 2026

Full-Stack Developer

- Designed a secure, serverless REST API using Node.js and Express, deploying the backend to Vercel's edge network.
- Designed a normalized relational database using PostgreSQL, utilizing raw parameterized SQL queries to guarantee data integrity and prevent SQL injection.
- Implemented a stateless authentication pipeline utilizing Bcrypt for password hashing and JWT (JSON Web Tokens) for secure route protection.
- Built a responsive frontend interface using React.js and Tailwind CSS, integrating strict input validation via `express-validator` to ensure clean data flow.

Education Level

Parahyangan Catholic University - Bandung, Indonesia

Aug, 2017 - Aug, 2024

Bachelor Degree of Computer Science

- Relevant Course Works: Information Management and Databases, Web-based Programming, and Human Computer Interaction.

Courses, Training and Certifications

Harisenin.com - Jakarta, Indonesia

Dec, 2025 - Apr, 2026

Full Stack Developer Bootcamp

- Relevant Course works: HTML, CSS, JavaScript, React.js, MySQL, Node.js and Next.js

Cognitive Class

Apr, 2020

SQL and Relational Databases 101

- Certificate: <https://courses.cognitiveclass.ai/certificates/d1429f6c288e4c2286cd3ed1e9b13609>

Skills

Technical skills: HTML, CSS, JavaScript, Node.js, React.js, Next.js, MySQL, PostgreSQL, Prisma, RESTful API and Git

Soft skills: Problem Solving, Time Management, Orientation to Detail, Analytical Thinking and Teamwork

Languages: Indonesian (Native), English (Advanced)
